Subject: Techalloy Revised June 2015 Monthly Progress Report

John--per our phone conversation I have no comments on the revised version of the report. However, it would be useful if there was a discussion of the sampling data from the pump and treat wells that included the historical data and some analysis of trends in data and when pumping in the wells might cease. Per the interest of the landowner, this information is of some concern. It is not necessary to present this analysis in the June Progress Report. August or Septemebr would likely be more suitable.
